## AST 5-Axis Waterjet Cutting

- 5-Axis Waterjet Cutting head has a full 360° rotation combined with up to 90° off vertical. No matter the angle we'll cut it.
- Perfect for Cutting Bevels or Countersinks
- Programmable Z axis facilitates fluid motion of 3D designs.
- Cuts any type of material including Stainless Steel, Steel, Aluminum, Pipe / Tube, Plastics, & Foam. Material can be formed or flat.
- Thickness ranging from .002" to 13"

AST belongs to an exclusive group of companies that can Waterjet cut in 3-D. Our 5-Axis Waterjet cutting table has an 8' x 12' cutting envelope and 36" of cutting clearance. We also have a full CNC Rotary Indexer to cut Pipe & Tube to 12" wide and 144" long.

AST is able to cut any shape, including 3-D shapes, from all types of material ranging from .002" Shim Stock to 13" Stainless Steel. Our table will hold material up to 144" wide by 144" long and up to 12" wide pipe in ANY thickness. We cut Aluminum, Stainless Steel, Copper, Titanium, Granite, Marble, Plastics, Phenolics, Composites, and Glass.

Since 1993, AST has provided precision Shapecutting services using Waterjet, Router, Hi-def Plasma, and Laser cutting technology. We have 3 Waterjet tables equipped with 10 cutting heads, 1 Router, 1 5-Axis Hi-Def Plasma, and 3 Lasers that all utilize the latest in CNC Controls to provide extremely accurate cutting whether your needs are for small prototype runs or repetitive production parts.
