ISO9001:2015 / AS9100:2016 REGISTERED COMPANY

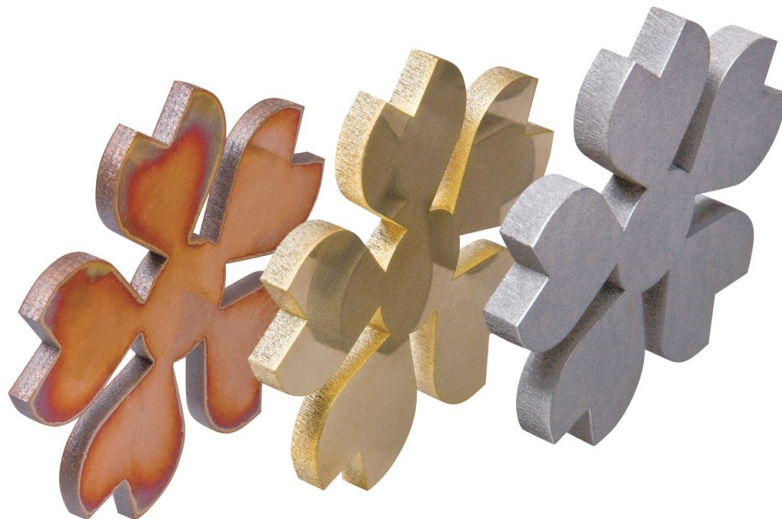

## Fiber Laser Cutting

- Cutting speeds over 6,000 inches per minute
- Cuts Stainless Steel, Steel & Aluminum, Copper, Brass, & Titanium.
- Thickness ranging from .002" to 1"

AST belongs to an exclusive group of companies that can Laser, Waterjet & Router cut in 3-D. AST's Lasers are ultra-high speed 3-dimensional, 4-axis 4,000 Watt laser systems with dual pallet changers and a Rotary indexer. This added flexibility will allow AST to Laser cut a variety of materials with excellent precision and speed.

Since 1993, AST has provided precision Shapecutting services using Waterjet, Router, and Laser cutting technology. We have 5 Axis Waterjet tables equipped with 10 cutting heads, 1 Router, & 2 Lasers that all utilize the latest in CNC Controls to provide extremely accurate cutting whether your needs are for small prototype runs or repetitive production parts.
